

# ASPECTS DISCUSSED DURING THE MERIDA BOARD MEETING

---

## 1. The function of the International Committee.

There is an agreement for a more active role helping the organizer of the corresponding meeting to decide the subjects of interest. Scientific subjects as Proteonomics have to be represented in specific sessions. There is also an interest in promoting the Wine and Beer sessions.

## 2. Next Meetings.

Some aspects of the Beijing meeting have been presented by Zhuan Zhou regarding the possible dates and places as well as the possible link with other meetings taking place in Beijing (Biophysics). He will be contacting the Committee with more information when available.

Youssef Anouar in representation of France members has presented the candidature of Rouen for the 2013 ISCCB meeting.

Frederic Meunier and Bruce Livett expressed the interest of Australian members in organizing the 2015 meeting in the northeast of Australia (near the Great reef barrier before this natural wonder disappears!).

## 3. Other points.

There is a need for actualization of the chromaffin club members list that has to be sent to organizers of the future meetings. It has been also discussed the need for the identification and stabilization of the funds required for meeting organization.

Finally there is agreement in expressing the gratitude of the International Committee to Arturo Hernandez-Cruz for his organization of the Merida 15<sup>th</sup> Meeting.
